15 conditions per model; each row is a separate fresh context.
Numbers = position within the reported answer
G generate 10
F predict all 10
S1 predict only 1
S2 predict only 2
S3 predict only 3
S4 predict only 4
S5 predict only 5
S6 predict only 6
S7 predict only 7
S8 predict only 8
S9 predict only 9
S10 predict only 10
W1-5 predict 1..5
W3-7 predict 3..7
W6-10 predict 6..10
1 2 3 4 5 6 7 8 9 10
original serial position in the hypothetical 10-roll sequence
